3rd year Project Progress Report

Project title: IoT assisted living projects – mental health data analysis

|	
Student name: Xinyao Qian	**Student no.:** 19021373

Week ending: Friday, 15 October 2021

Meeting with supervisor or advisor
This meeting firstly checked about students' risk assessment writing progress. Then each student shared their reading result over the week and raised several related questions. Finally, the project proposal was discussed in detail, and the deadline was set at 17/10/2021.

Progress this week

1. What to notice: for continuous monitoring, the data is important to be cleaned and acquired in a specific period
2. Familiar with the general methodology in IoT machine learning papers and developed an initial flow chart.

3. Decided to search and use dataset collected on wearable devices and justified they are essential.

4. Aware that the cloud storage and communication content should be considered in the project.

Have you met your objectives?
- Yes.
Did you discover unforeseen difficulties?
- No.

Plans / objectives for the coming week

1. For dataset, select terms that might be used for the prediction
2. Finish the risk assessment by this Friday.
3. Finish the project proposal by this Friday.
